Higher Speeds available for Business—Call for details

- **\$399.00 installed, normally \$699.00 a savings of \$300.00.** (Custom wiring extra)

Fiberpipe retains ownership of the equipment.

- The Fiberpipe Broadband Internet infrastructure includes 128bit encryption and VPN tunnel for added security.

A Standard Installation includes the following equipment and completed tasks:

- CPE (Customer Premises Equipment) Radio • Mount (if needed) for CPE • 50 feet of terminated CAT5 cable • Verification of internet connectivity to device or computer • Fiberpipe Email Setup •

The install will include mounting the CPE and running the cable from CPE through ONE outside wall to a single data port. The data port can be either in a single computer or into one device (router, switch, hub, etc.)

Installations that deviate from the above definition will incur additional charges including but not limited to:

Cable lengths running more than 50 feet will be assessed at \$0.30 per additional foot

- Surface mount jack: \$19.95 + \$25 for jack installation
- Penetration of additional walls: \$25 per wall.
- Crawl Space or Attic runs: \$25
- Mount to Brick or Stucco: \$10
- Anti-virus installation: \$25
- Wireless Router Programming: \$25 (if not purchased from Fiberpipe)
- Fishing cable through walls: \$25

Experience Fiberpipe's new WiFi Portal

Fiberpipe now offers a web based log in screen for roaming users. New customers can begin accessing the Internet in minutes without any software downloads or calls to customer service. This does not require any special connection software and will support all laptop and PDA operating systems.
